- 2.) Connect Power BI Desktop to a CSV file that contains IPL cricket match results (team names, scores, date). Use the DirectQuery mode and explain in one line how DirectQuery differs from Import for this data.

ANSWERS:

DirectQuery: in Power BI does not import data it fetches live data directly from the source whenever you interact with a report

- 3) Use Power BI's Web connector to import trending movie data from a public web page (such as IMDb Top 250 or a similar site). Display the movie titles and ratings in a table visual.

Hint Use the 'Get Data' 'Web' option and enter the URL of the table page.

ANSWERS:

Title	Rank
Avatar	2
Avengers: Endgame	5
Doctor Zhivago	9
E.T. the Extra-Terrestrial	7
Gone with the Wind	1
Jaws	10
Star Wars	4
The Sound of Music	6
The Ten Commandments	8
Titanic	3

- 4) Connect Power BI to a MySQL or SQL Server database (use a sample database if you don't have your own) and load a table of products (like those on Flipkart or Myntra) with columns for name, price, and category.

ANSWERS:
