

Session 10:

1. Import a sample dataset of IPL cricket matches into Power BI and create a Table visual that displays Team Name, Runs Scored, and Match Date.

Ans: **Code (Steps)**

1. Open Power BI Desktop
2. Click "Get Data" → CSV
3. Select IPL dataset file → Load
4. Go to Report View
5. Click "Table" visual
6. Drag these fields:
 - Team Name
 - Runs Scored
 - Match Date

#table visual used

The screenshot displays the Power BI Desktop interface. The main area shows a Table visual with the following data:

Team Name	Sum of Runs Scored	Year	Quarter	Month	Day
CSK	165	2023	Qtr 2	April	2
DC	190	2023	Qtr 2	April	6
GT	210	2023	Qtr 2	April	9
KKR	175	2023	Qtr 2	April	4
LSG	160	2023	Qtr 2	April	10
MI	180	2023	Qtr 2	April	1
PBKS	170	2023	Qtr 2	April	8
RCB	200	2023	Qtr 2	April	3
RR	185	2023	Qtr 2	April	7
SRH	150	2023	Qtr 2	April	5
Total	1785				

The right-hand pane shows the 'Visualizations' and 'Data' sections. The 'Visualizations' pane lists the fields used in the table: Team Name, Sum of Runs Scored, Match Date, Year, Quarter, Month, and Day. The 'Data' pane shows the data source 'ipl_matches' with the fields 'Match Date', 'Runs Scored', and 'Team Name' selected.

2. Using a dataset of Zomato restaurant ratings, create a Matrix visual in Power BI that shows average rating per City and Cuisine type.

Ans: **Code (Steps)**

1. Load Zomato dataset in Power BI

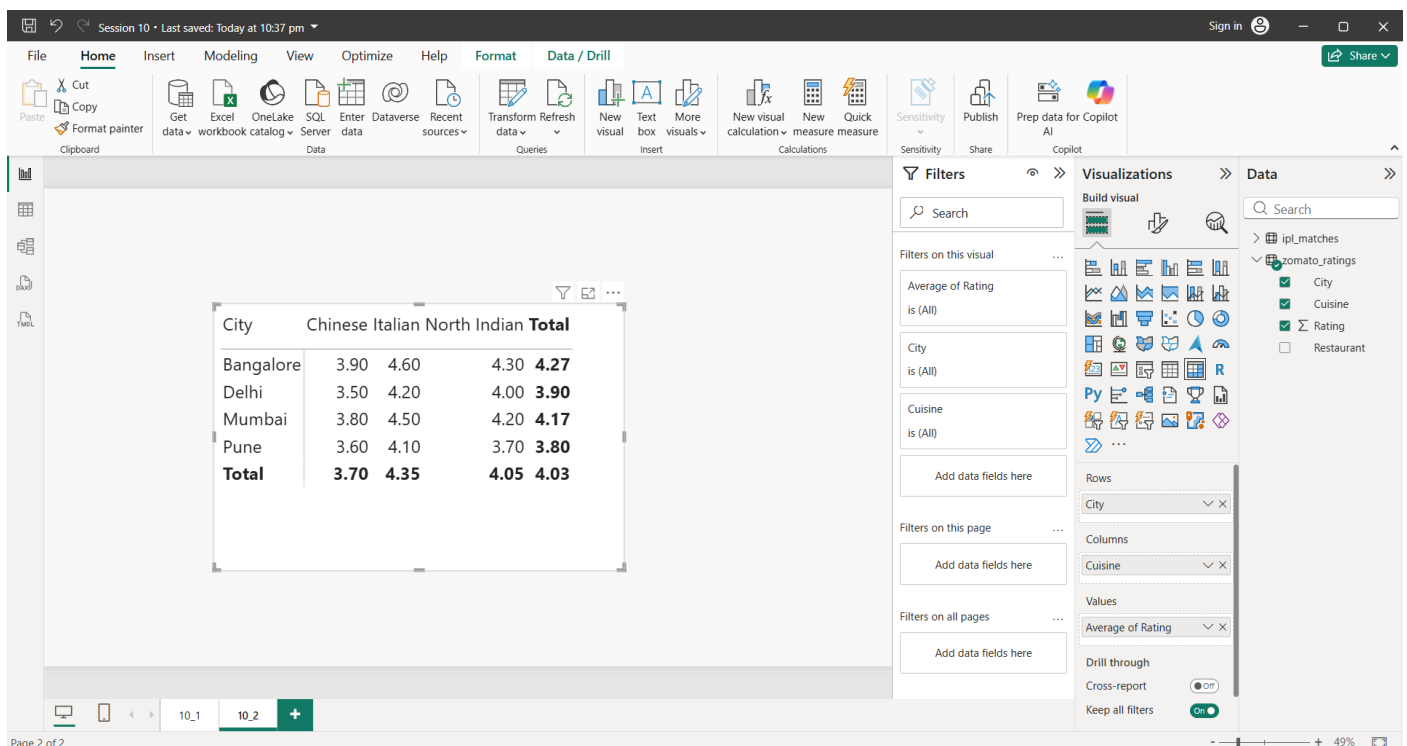

2. Go to Report View

3. Select "Matrix" visual

4. Drag fields:

- Rows → City
- Columns → Cuisine
- Values → Rating (change to Average)

#matrix used

3. Design a Card visual in Power BI to display the total number of active users from a Flipkart user data file.

Ans: **Code (Steps)**

1. Load Flipkart user dataset

2. Go to Report View

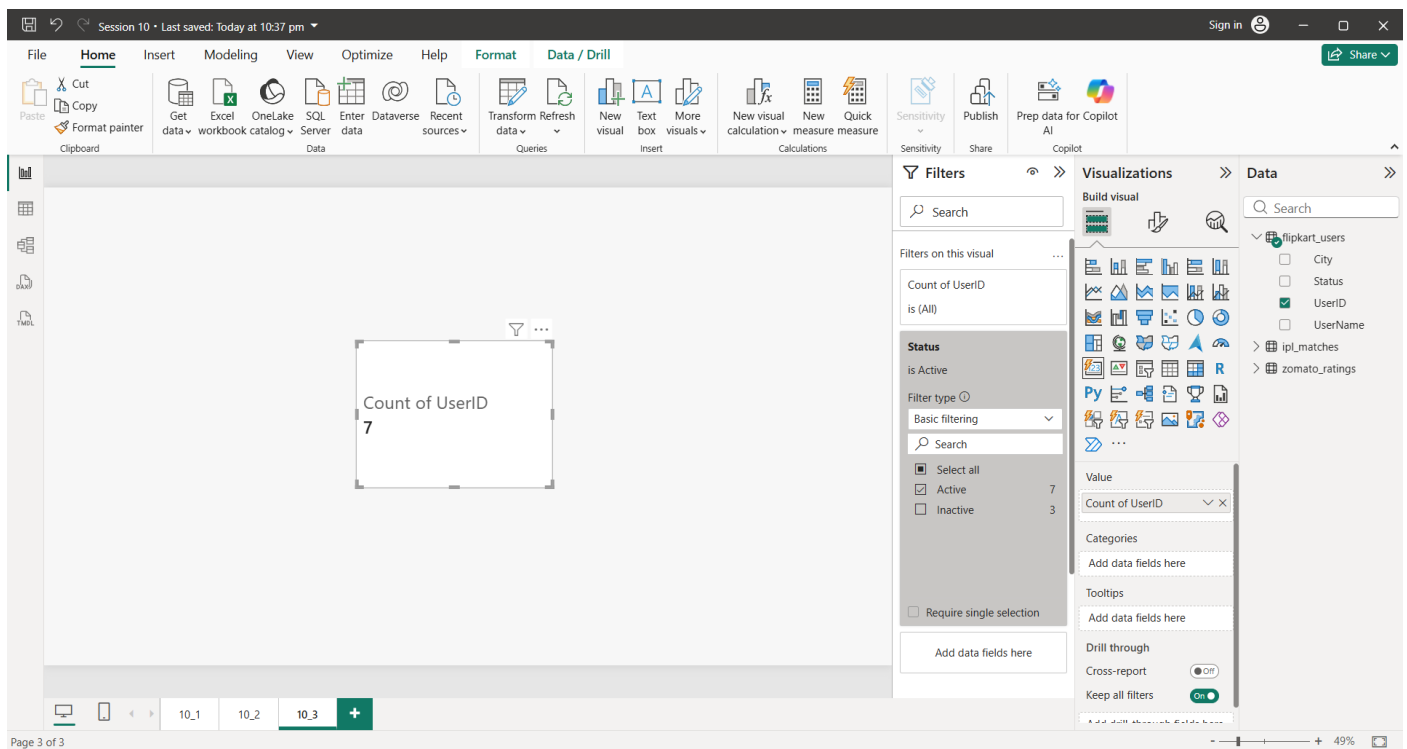

3. Click "Card" visual

4. Drag "UserID" (or Name column) into Values

5. Filter lagao:

Active Status = "Active"

“Active” status planted in filters

4. Build a KPI visual in Power BI that tracks the monthly increase in Spotify premium subscriptions and shows whether the current month's number is higher or lower than the previous month.

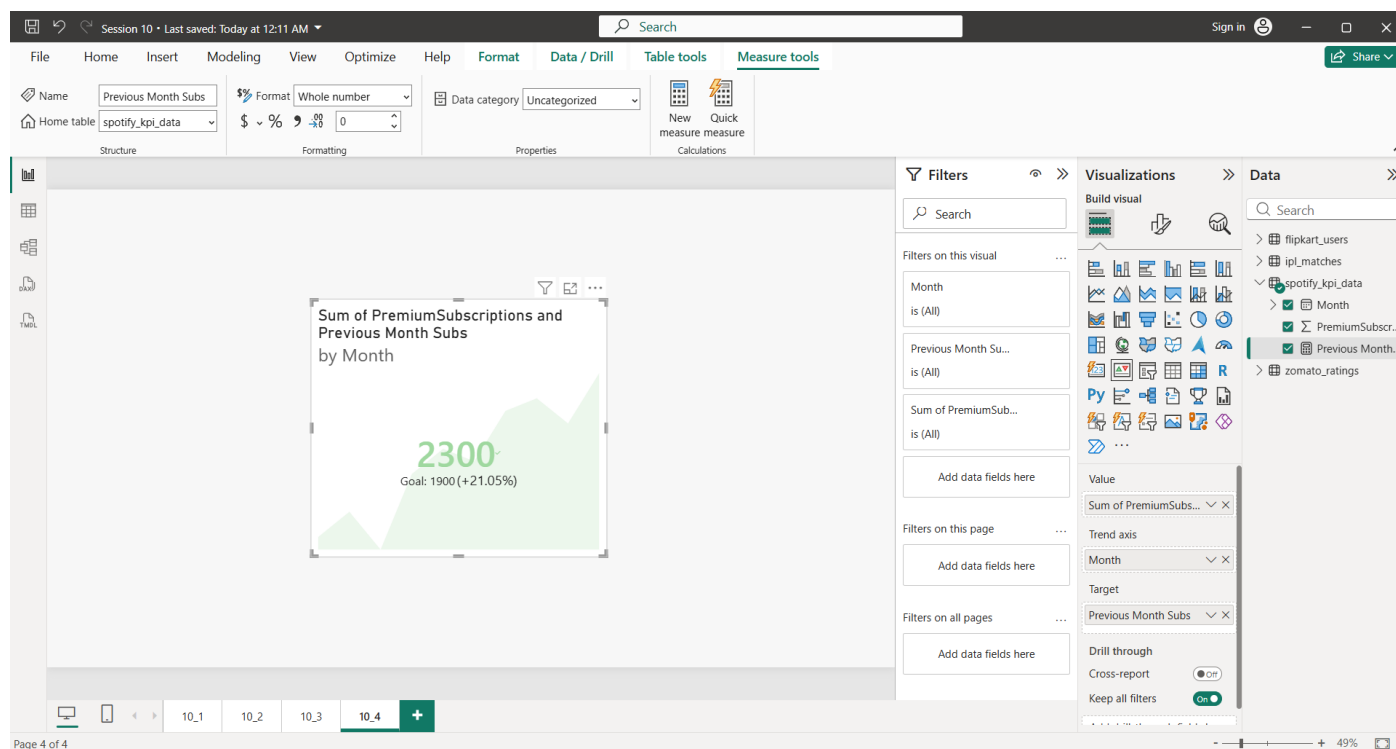

Ans: **Steps:**

1. **KPI visual add karo**
2. **Value → PremiumSubscriptions**
3. **Trend Axis → Month**
4. **New Measure banao:**

Previous Month Subs =

```
CALCULATE(  
    SUM(spotify_kpi_data[PremiumSubscriptions]),  
    PREVIOUSMONTH(spotify_kpi_data[Month])  
)
```

5. **Target → Previous Month Subs**

5. Create a Bar or Column chart in Power BI using a BookMyShow movie bookings dataset to compare the number of tickets sold for the top 5 movies.
Hint: Use the 'Top N' filter to show only the top 5 movies by ticket sales.

Ans:**Steps**

Column Chart (Vertical)

Steps

1. Home → Get Data → CSV → select file
2. Visualizations → Column Chart select karo
3. Fields:
X-axis → MovieTitle
Y-axis → Seats (Sum)
4. Filters:
MovieTitle → Top N → 5
By value → Seats (Sum)
Apply filter
5. Sort:
(...) → Sort by Seats → Descending

Bar Chart (Horizontal)

Steps

1. Home → Get Data → CSV → select file
2. Visualizations → Bar Chart select karo
3. Fields:
Y-axis → MovieTitle
X-axis → Seats (Sum)
4. Filters:
MovieTitle → Top N → 5
By value → Seats (Sum)
Apply filter
5. Sort:
(...) → Sort by Seats → Descending

#column and bar chart
